- Municipalities
- Forestry
- Oil & Gas
- Mining
- Solid Waste
- Automotive Salvage
- Aerospace
- Aircraft
- Machine Tool
- Steel Mills
- Petrochemical
- Engine Rebuild
- Forklift and Warehouse

The **HDP Wash Pad Modules** by ESD can be assembled together to create a multitude of wash pad configurations - easily and economically. By using the 5'x10' or 8'x8' modules, you can create a wash pad to meet your size and load capacity requirements.

Optional Accessories like walls, ramps and heavy solids trough allow easy customization to your specific operations. The addition of an add-on biological wash water recycle system, transforms your new contained wash area into a closed loop system that can be used with pressure washers or flood type wash at up to 15 GPM.

The above ground pad design is easy to set-up and maintain. It captures and controls your wastewater and avoids soil and groundwater contamination. Plus, it is portable by design...and can be relocated easily!

ESD offers expert design and configuration assistance - contact us to discuss your application.

Specifications:

Model	HDP-510	HDP-88
Wash Pad Modules	5'x10' each	8'x8' each
Load Capacity	starting at 7,500 lbs. per sq. ft, 10,000 lbs. per pad	
Material of Construction	Mild Steel	
Options	4' High Walls 8' High Walls Ramps (8'W x 6'L) Mud Trough
