

RDV – Sludge Drying System

The Rotary Drum Vacuum System by ESD Waste2Water Inc. is designed to reduce moisture content in sludge by 85% or more. The RDV produces a cake material that can be easily transported for disposal.

Advantages of RDV

- Continuous and Automatic Operation
- Low Cost of Operation
- Byproduct Water Reintroduced to Closed Loop System

ROTARY VACUUM DRUM DRYER

CAPACITY	VACUUM	DIMENSIONS	ELECTRICAL	NET WEIGHT
150 Gallons	20 CFM	36" x 60" x 72" (W x L x H)	240 Volt Single Phase 30 Amp	250 lbs.

Certified to UL-508A Standards
