

RDV – Field & Turf Paint Recycle System

The Rotary Disc Vacuum System by ESD Waste 2 Water Inc. is designed to reduce moisture content in sludge by 85% or more. The RDV produces a cake material that can be easily transported for disposal.

Advantages of RDV

- Continuous and Automatic Operation
- Low Cost of Operation
- Water is reused back to hose for cleaning
- Paint is dried to a cake for easy disposal

Applications

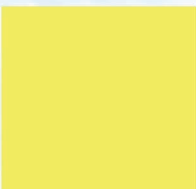

- Soccer Fields
- Parks
- Stadiums
- Baseball Fields
- Football Fields

Certified to UL-508A Standards
